

Dear Judge Robinson Civil Action #05-624 (SLR)

I sent you a amendment on the current suit that I have in your court close to a month ago, but I haven't heard anything as to the fact that you even received my amendment at this time.

Please get back to me on this matter.

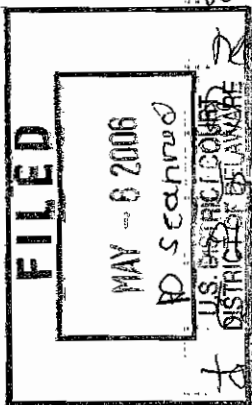

Also in the response to the Attorney General's request to dismiss this case, the point of the matter is that she is stating that I received the proper treatment from medical, but if that were so, I would not have wasted my time and the courts as well in the matter. The truth is that for along time I never received Arthritis meds and was told that they didn't carry Arthritis medications, and I also told them that I couldn't take what they wanted to give, me do to the fact that I have Hepatitis C, in fear of causing more liver damage.

But I did finally receive Arthritis med some 4 months later.

Do I suffer undue hardships, with no pain medication because I had a bad gall bladder and wasn't considered to be of any priority in this matter.

The truth of the matter is medical and wardens staff is negligent in alot of matters when it came to my health issues, and that no body at the times and even now wants to accept responsibility for there actions in this matter.

I don't spell to good and the only reason why I'm writing this letter in this case now is because, like

I said, I haven't heard anything as far as you receive my packet that I sent the court.
